

Cal MediConnect

CY 2020 Updated Final Medicare Rate Report

Updated May 22, 2020

The Centers for Medicare & Medicaid Services (CMS), in conjunction with the State of California, is providing updated information regarding the Medicare component of the CY 2020 rates for the California Demonstration to Integrate Care for Dual Eligible Beneficiaries, also known as Cal MediConnect.

The general principles of the rate development process for the Demonstration have been outlined in the three-way contract between CMS, the State of California, and the Prime Contractor Plans.

Included in this report are the updated final CY 2020 Medicare county base rates. *Please note, this rate report incorporates updates to the Medicare rates for 2020, given the suspension of sequestration from May 1, 2020 through December 31, 2020 per Section 3709 of the Coronavirus Aid, Relief, and Economic Security Act (the "CARES Act"); more information is available in the HPMS memo "Medicare Advantage/Prescription Drug System (MARx) May 2020 Payment – INFORMATION" released on April 22, 2020.* The California Medicaid component of the rate will be released at a later date. An updated report will be provided when the Medicaid rates are finalized.

I. Components of the Capitation Rate

CMS and the State of California will each contribute to the global capitation payment. CMS and the State of California will each make monthly payments to Prime Contractor Plans for their components of the capitated rate. Prime Contractor Plans will receive three monthly payments for each enrollee: one amount from CMS reflecting coverage of Medicare Parts A/B services, one amount from CMS reflecting coverage of Medicare Part D services, and a third amount from the State of California reflecting coverage of Medicaid services.

The Medicare Parts A/B rate component will be risk adjusted using the prevailing Medicare Advantage CMS-HCC and CMS HCC-ESRD models, with an outlier adjustment for certain institutionalized beneficiaries in Los Angeles and Orange Counties as noted in Section III. The Medicare Part D payment will be risk adjusted using the Part D RxHCC model. California uses a single, blended payment rate that weights the relative risk of the population enrolled in each Prime Contractor Plan for the purpose of risk adjusting the Medicaid payment.

Section II of this report provides information on the Medicaid component of the capitation rate. Section III includes the Medicare Parts A/B and Medicare Part D components of the rate. Section IV includes information on the savings percentages and quality withholds. Section V includes information on risk mitigation.

II. Medicaid Component of the Rate – CY 2020

Pending

DRAFT

Cal MediConnect
CY 2020 Updated Final Medicare Rate Report
Updated May 22, 2020

III. Medicare Components of the Rate – CY 2020

Medicare A/B Services

CMS has developed baseline spending (costs absent the Demonstration) for Medicare A and B services using estimates of what Medicare would have spent on behalf of the enrollees absent the Demonstration. With the exception of specific subsets of enrollees as noted below, the Medicare baseline for A/B services is a blend of the Medicare Fee-for-Service (FFS) Standardized County Rates, as adjusted below, and the Medicare Advantage projected payment rates for each year, weighted by the proportion of the enrolled population in each program prior to the Demonstration. The Medicare Advantage baseline spending includes costs that would have occurred absent the Demonstration, such as quality bonus payments for applicable Medicare Advantage plans.

Both baseline spending and payment rates under the Demonstration for Medicare A/B services are calculated as PMPM standardized amounts for each Demonstration county. Except as otherwise noted, the Medicare A/B portion of the baseline is updated annually based on the annual FFS estimates and benchmarks released each year with the annual Medicare Advantage and Part D rate announcement, and Medicare Advantage bids (for the applicable year or for prior years trended forward to the applicable year) for products in which Demonstration enrollees were enrolled prior to Demonstration.

Medicare A/B Component Payments: Final CY 2020 Medicare A/B Baseline County rates are provided below.

The final rates represent the weighted average of the CY 2020 FFS Standardized County Rates, updated to incorporate the adjustments noted below, and the Medicare Advantage projected payment rates for CY 2020 based on the actual enrollment of beneficiaries from Medicare FFS and Medicare Advantage prior to demonstration enrollment at the county level.

Bad Debt Adjustment: The FFS component of the CY 2020 Medicare A/B baseline rate has been updated to reflect a 1.87% upward adjustment to account for the disproportionate share of bad debt attributable to Medicare-Medicaid enrollees in Medicare FFS (in the absence of the Demonstration).

Outlier Adjustment: CMS will also make an outlier adjustment for Medicare A/B payments for non-ESRD beneficiaries in Los Angeles and Orange Counties. This adjustment is limited to those new Cal MediConnect members who newly enrolled in the Cal MediConnect demonstration as of January 1, 2017, or later; were in Medicare long-term institutional (LTI) status at the time of their Cal MediConnect enrollment; and were in Medicare FFS at the time of their Cal MediConnect enrollment. This adjustment will reflect the historical ratio of actual Medicare A/B FFS costs for the LTI population in these counties, based on the standardized FFS county rates and the HCC risk adjustment model. This payment adjustment will be made retroactively after the end of each demonstration year. The outlier adjustment is a multiplicative factor equal to 95% of 1 (one) subtracted from the ratio of actual costs to predicted costs for people in the “LTI” category for a baseline period. Specifically, the adjustment for CY 2020 will equal: (the outlier adjustment

Cal MediConnect
CY 2020 Updated Final Medicare Rate Report
Updated May 22, 2020

percentage of 95%) times (the underprediction figure) times (the standardized FFS county rate for the CY 2020 for the applicable county) times (the average final HCC risk score for the CY 2020 for the population meeting the required criteria) times (the number of member months for CY 2020 associated with this population).

Disenrollment Penalty: Beginning in Demonstration Year 5 (CY 2019) CMS will implement a retrospective financial penalty in the Medicare A/B rate component for Prime Contractor Plans with high disenrollment rates. Based on plan performance, CMS will recoup the Medicare A/B penalty retroactively, once performance for the applicable Demonstration Year has been determined.

Coding Intensity Adjustment: CMS annually applies a coding intensity factor to Medicare Advantage risk scores to account for differences in diagnosis coding patterns between the Medicare Advantage and the Original Fee-for-Service Medicare programs. The adjustment for CY 2020, as in Medicare Advantage, is 5.90%.

Impact of Sequestration: Under sequestration, for services beginning April 1, 2013, Medicare payments to providers for individual services under Medicare Parts A and B, and non-exempt portions of capitated payments to Part C Medicare Advantage Plans and Part D Medicare Prescription Drug Plans are reduced by 2%. These reductions are also applied to the Medicare components of the integrated rate. Therefore, under Cal MediConnect CMS will reduce non-exempt portions of the Medicare components of the integrated rate by 2%, as noted in the sections below. As noted above, sequestration is temporarily suspended for Medicare programs between May 1, 2020 and December 31, 2020.

Default Rate: The default rate will be paid when a beneficiary's address on record is outside of the service area. The default rate is specific to each Prime Contractor Plan and is calculated using an enrollment-weighted average of the rates for each county in which the Prime Contractor Plan participates.

Santa Clara	1,000.49	1,019.20	1,012.48	971.98	-0.95%	962.36	943.11

¹Rates do not apply to beneficiaries with End-Stage Renal Disease (ESRD) or those electing the Medicare hospice benefit.

²Applicable rates for May 1, 2020 to December 31, 2020 (prior to application of the quality withhold) given the temporary suspension of sequestration.

The Medicare A/B PMPMs above will be risk adjusted at the beneficiary level using the prevailing CMS-HCC risk adjustment model.

Cal MediConnect
CY 2020 Final Medicare Rate Report
Updated May 22, 2020

Beneficiaries with End-Stage Renal Disease (ESRD): Separate Medicare A/B baselines and risk adjustment models apply to enrollees with ESRD. The Medicare A/B baselines for beneficiaries with ESRD vary by the enrollee's ESRD status: dialysis, transplant, and functioning graft, as follows:

- **Dialysis:** For enrollees in the dialysis status phase, the Medicare A/B baseline is the CY 2020 California ESRD dialysis state rate, updated to incorporate the impact of sequestration-related rate reductions. The CY 2020 ESRD dialysis state rate for California is \$8,575.28 PMPM; this payment rate will apply for May through December 2020. The updated CY 2020 ESRD dialysis state rate incorporating a 2% sequestration reduction and prior to the application of the quality withhold is \$8,403.77 PMPM; this payment rate will apply for January through April 2020. These payment rates apply to applicable enrollees in all counties and will be risk adjusted using the prevailing HCC-ESRD risk adjustment model.
- **Transplant:** For enrollees in the transplant status phase (inclusive of the 3-months starting with the transplant), the Medicare A/B baseline is the CY 2020 California ESRD dialysis state rate, updated to incorporate the impact of sequestration-related rate reductions. The CY 2020 ESRD dialysis state rate for California is \$8,575.28 PMPM; this payment rate will apply for May through December 2020. The updated CY 2020 ESRD dialysis state rate incorporating a 2% sequestration reduction and prior to the application of the quality withhold is \$8,403.77 PMPM; this payment rate will apply for January through April 2020. These payment rates apply to applicable enrollees in all counties and will be risk adjusted using the prevailing HCC-ESRD risk adjustment model.
- **Functioning Graft:** For enrollees in the functioning graft status phase (beginning at 4 months post-transplant) the Medicare A/B baseline is the Medicare Advantage 3.5% bonus county rate/benchmark (see table below). This Medicare A/B component will be risk adjusted using the prevailing HCC-ESRD functioning graft risk adjustment model.

A savings percentage will not be applied to the Medicare A/B baseline for enrollees with ESRD (inclusive of those enrollees in the dialysis, transplant and functioning graft status phases).

**Cal MediConnect
CY 2020 Final Medicare Rate Report
Updated May 22, 2020**

2020 Medicare A/B Baseline PMPM, Beneficiaries with ESRD Functioning Graft Status, Standardized 1.0 Risk Score, by Demonstration County		
County	2020 3.5% bonus County Rate (Benchmark)*	2020 Sequestration-Adjusted Medicare A/B Baseline (after application of 2% Sequestration reduction)
	Applicable payment rate for May through December 2020	Applicable payment rate for January through April 2020
Los Angeles	\$1,050.42	\$1,029.41
Orange	961.26	942.03
Riverside	984.89	965.19
San Bernardino	975.29	955.78
San Diego	980.61	961.00
San Mateo	1,005.99	985.87
Santa Clara	1,035.51	1,014.80

*Applicable rates for May 1, 2020 to December 31, 2020 (prior to application of the quality withhold) given the temporary suspension of sequestration.

Beneficiaries Electing the Medicare Hospice Benefit: If an enrollee elects to receive the Medicare hospice benefit, the enrollee will remain in the Demonstration but will obtain the hospice services through the Medicare FFS benefit. The Prime Contractor Plans will no longer receive the Medicare A/B payment for that enrollee. Medicare hospice services and all other Original Medicare services will be paid under Medicare FFS. The Prime Contractor Plans and providers of hospice services will be required to coordinate these services with the rest of the enrollee’s care, including with Medicaid and Part D benefits and any additional benefits offered by the Prime Contractor Plans. The Prime Contractor Plans will continue to receive the Medicare Part D and Medicaid payments, for which no changes will occur.

CY 2020 Final Medicare Rate Report
Updated May 22, 2020

Medicare Part D Services

The Part D plan payment is the risk adjusted Part D national average monthly bid amount (NAMBA) for the payment year, adjusted for payment reductions resulting from sequestration applied to the non-premium portion of the NAMBA. The non-premium portion is determined by subtracting the applicable regional Low-Income Premium Subsidy Amount from the risk adjusted NAMBA. To illustrate, the NAMBA for CY 2020 is \$47.59 and the CY 2020 Low-Income Premium Subsidy Amount for California is \$32.01. Thus, the updated California Part D monthly per member per month payment for a beneficiary with a 1.0 RxHCC risk score applicable for CY 2020 is \$47.28. This amount incorporates a 2% sequestration reduction to the non-premium portion of the NAMBA. This amount will apply from January through April 2020.

The updated California Part D monthly per member per month payment for a beneficiary with a 1.0 RxHCC risk score applicable for CY 2020 is \$47.59. This amount will apply from May through December 2020.

CMS will pay an average monthly prospective payment amount for the low income cost-sharing subsidy and Federal reinsurance amounts; these payments will be 100% cost reconciled after the payment year has ended. These prospective payments will be the same for all counties, and are shown below.

- California low income cost-sharing: \$115.32 PMPM
- California reinsurance: \$75.78 PMPM

The low-income cost sharing and reinsurance subsidy amounts are exempt from mandatory payment reductions under sequestration.

A savings percentage will not be applied to the Part D component of the rate. Part D payments will not be subject to a quality withhold.

Additional Information: More information on the Medicare components of the rate under the Demonstration may be found online at: <http://www.cms.gov/Medicare-Medicaid-Coordination/Medicare-and-Medicaid-Coordination/Medicare-Medicaid-Coordination-Office/Downloads/JointRateSettingProcess.pdf>

IV. Savings Percentages and Quality Withholds

Savings Percentages

One of the components of the capitated financial alignment model is the application of aggregate savings percentages to reflect savings achievable through the coordination of services across Medicare and Medicaid. This is reflected in the rates through the application of aggregate savings percentages to both the Medicaid and Medicare A/B components of the rates.

CMS and California established composite minimum savings percentages for each year of the Demonstration, as shown in the table below. The savings percentage will be applied to the Medicaid and Medicare A/B components of the rates, uniformly to all population groups. The savings percentage will not be applied to the Part D component of the joint rate.

Year	Calendar dates	Minimum savings percentage
Demonstration Year 1	April 1, 2014 through December 31, 2015	1%
Demonstration Year 2	January 1 through December 31, 2016	2%
Demonstration Year 3	January 1 through December 31, 2017	4%
Demonstration Year 4	January 1 through December 31, 2018	4%
Demonstration Year 5	January 1 through December 31, 2019	4%
Demonstration Year 6	January 1 through December 31, 2020	4%
Demonstration Year 7	January 1 through December 31, 2021	4%
Demonstration Year 8	January 1 through December 31, 2022	4%

*County-specific savings percentages for Demonstration Year 6 are provided below.

County	County-specific Savings Percentages
Los Angeles	+ 1.50%
Orange	+ 1.50%
Riverside	+ 1.14%
San Bernardino	+ 1.50%
San Diego	+ 1.10%
San Mateo	+ 0.00%
Santa Clara	+ 0.95%

Quality Withhold

The quality withhold is 4% in Demonstration Years 6-8. More information about the quality withhold methodology is available in the CMS core and state-specific quality withhold technical notes, which are posted at the following link: <https://www.cms.gov/Medicare-Medicaid-Coordination/Medicare-and-Medicaid-Coordination/Medicare-Medicaid-Coordination-Office/FinancialAlignmentInitiative/MMPInformationandGuidance/MMPQualityWithholdMethodologyandTechnicalNotes.html>.

Cal MediConnect
CY 2020 Final Medicare Rate Report
Updated May 22, 2020

V. Risk Mitigation

Risk Corridors (Consistent with extension terms currently being finalized)

The Demonstration will utilize a one-sided risk corridor for Demonstration Years 6 through 8. The risk corridor will include all Medicare A/B and Medicaid eligible expenditures. The risk corridors will be reconciled after the application of risk adjustment methodologies (e.g., CMS-HCC, Medicaid Relative Cost Factors and Relative Mix Factors), intergovernmental transfers, and as will consider the actual quality withhold payment received back by the Prime Contractor Plan. The three-way contract includes further details on how risk corridors are operationalized.

Risk Corridor Share: If the Prime Contractor Plan's costs, excluding Part D payments and costs, are lower than the Medicare A/B and Medicaid rate revenue, the risk corridor will be triggered.

The risk corridor will contain five bands, as follows:

- First Band: The Prime Contractor Plan will retain all of the gains that are equal to or less than five percent (5%) of the Adjusted Interim Capitation Rate Revenue received by the Prime Contractor Plan.
- Second Band: DHCS/CMS and the Prime Contractor Plan will share that portion of the gains that is over five percent (5%) and less than or equal to seven percent (7%) of the Adjusted Interim Capitation Rate revenue received by the Prime Contractor Plan, with seventy-five percent (75%) retained by the Prime Contractor Plan and twenty-five percent (25%) paid to DHCS/CMS.
- Third Band: DHCS/CMS and the Prime Contractor Plan will share that portion of the gains that is over seven percent (7%) and less than or equal to nine percent (9%) of the Adjusted Interim Capitation Rate revenue received by the Prime Contractor Plan, with fifty percent (50%) retained by the Prime Contractor Plan and fifty percent (50%) paid to DHCS/CMS.
- Fourth Band: DHCS/CMS and the Prime Contractor Plan will share that portion of the gains that is over nine percent (9%) and less than or equal to twelve percent (12%) of the Adjusted Interim Capitation Rate revenue received by the Contractor, with twenty-five percent (25%) retained by the Contractor and seventy-five percent (75%) paid to DHCS/CMS.
- Fifth Band: DHCS/CMS will recoup the entire portion of the gains that exceeds twelve percent (12%) of the Adjusted Interim Capitation Rate Revenue received by the Contractor

Medicare and Medicaid recoupments will be in proportion to their contribution to Adjusted Interim Capitation Rate Revenue (the total capitation rate revenue inclusive of Medicare Parts A/B and MediCal revenue, including the application of any risk adjustment methodologies, and excluding payments for Medicare Part D services).
